

Activity Report 2024

Fundación Diagrama

Activity Report

2024

[...] it is no business or concern of knights-errant to inquire whether any persons in affliction, in chains, or oppressed that they may meet on the high roads go that way and suffer as they do because of their faults or because of their misfortunes. It only concerns them to aid them as persons in need of help, having regard to their sufferings and not to their rascalities.

Miguel de Cervantes Saavedra
(Don Quijote de La Mancha)

Who we are

Fundación Diagrama Intervención Psicosocial is a non-profit organisation that has been assisting people in vulnerable situations or in social difficulties since 1991, consistently ensuring the defence and promotion of Human Rights.

Diagrama's **mission** is to promote and develop centres, programmes and research aimed at the assistance of people in social difficulties or risk, especially children, families, young people, women and people in a situation of dependency.

Fundación Diagrama's vision is to be a reference point for quality, commitment, good practice and efficiency in the comprehensive care of people in vulnerable situations and at risk of social exclusion, working daily towards their full social integration. To achieve this, Fundación Diagrama has developed a comprehensive and specialised intervention model, based on the wellbeing of people and of society as a whole, as well as on the continuous improvement of its own processes and resources.

In order to achieve this objective, Fundación Diagrama employs over **5,000 professionals** who work alongside volunteers and collaborators.

Since its inception, Diagrama has contributed to improving the quality of life and future prospects of over **563,000 people**, both in Spain and in various African and Latin American countries.

In recognition of its work and trajectory, Fundación Diagrama has been given various awards, both national and international, the most important of these being the **Golden Cross of the Civil Order of Social Solidarity**, the **Plaque of Honour of the Order of Civil Merit**, the **Plaque of Honour of the Civil Order of Alfonso X el Sabio** and the **Silver Medal for Social Penitentiary Merit**.

Diagrama also has **Special Consultative Status with the United Nations Economic and Social Council (ECOSOC)**.

The foundation develops programmes, projects and initiatives based on a comprehensive and specialised perspective in the following intervention areas:

- Socio-Educational Area.
- Socio-Healthcare Area.
- Socio-Occupational Integration Area.
- Training and Research Area.
- Development Cooperation Area.

Responsibility and Transparency

Fundación Diagrama has an **Ethical Code** that outlines the general principles that underpin all the actions launched in its intervention areas. This Code is based on responsibility, transparency, professionalism, commitment to service, integrity, independence and excellence, and is fundamentally and consistently guided by respect for, and defence and promotion of, Human Rights.

The foundation's **Social Responsibility Policy** was born of this framework of commitment to society. It focuses on ensuring that the activities of the organisation are part of a sustainable system that is both respectful and ethical regarding themes like environment, social development, work and training, education, dissemination of information, research, and promotion of Human Rights. In fact, Diagrama is a **constituent member of the Chair of Corporate Social Responsibility of the University of Murcia**.

Fundación Diagrama also has an extensive **Quality Management System** accredited by the **ISO 9001** certification for the management of educational centres and healthcare centres, as well as the financial and administrative management of grants for centres, programmes and projects.

Furthermore, the foundation has accredited the management of its residential healthcare centres, specifically the provision of personal, residential and health care, under the **UNE 158101** certification covering services for the promotion of personal autonomy.

Along with Diagrama's Social Responsibility Policy and Ethical Code, these systems for ensuring quality underpin each and every one of the actions carried out by the organisation, which in practice means maintaining and continuously improving a responsible, sustainable, transparent and externally-audited global process of management and provision of social services.

Aims and Objectives

- To support the development and management of **socio-educational and educational centres, services and programmes** aimed at vulnerable or socially excluded people.
- To support the development and management of **centres, services and programmes** aimed at **preventing** situations of social difficulty, as well as **assisting** and **reintegrating** vulnerable or socially excluded people.
- To support the development and management of **healthcare and socio-healthcare centres, services and programmes** aimed at providing comprehensive healthcare, especially directed at the elderly and those in need of assistance due to illness or physical/psychological disability.
- To support the creation and management of **centres, services and programmes aimed at social and occupational integration and training**.
- To support the creation and management of **centres, services and programmes of detoxification, rehabilitation and reintegration** of people with addiction problems, as well as prevention in this area.
- To support and manage **development cooperation projects**.
- To **carry out research** and studies and to produce **publications** in order to further the understanding of society and its transformation.
- To support **equality of opportunities** between men and women.
- To **raise public awareness** about current psychosocial and health issues.
- To support and guide **volunteering activities, self-help groups, foster families** and other social cooperation measures.
- To encourage **environmental care and protection**.

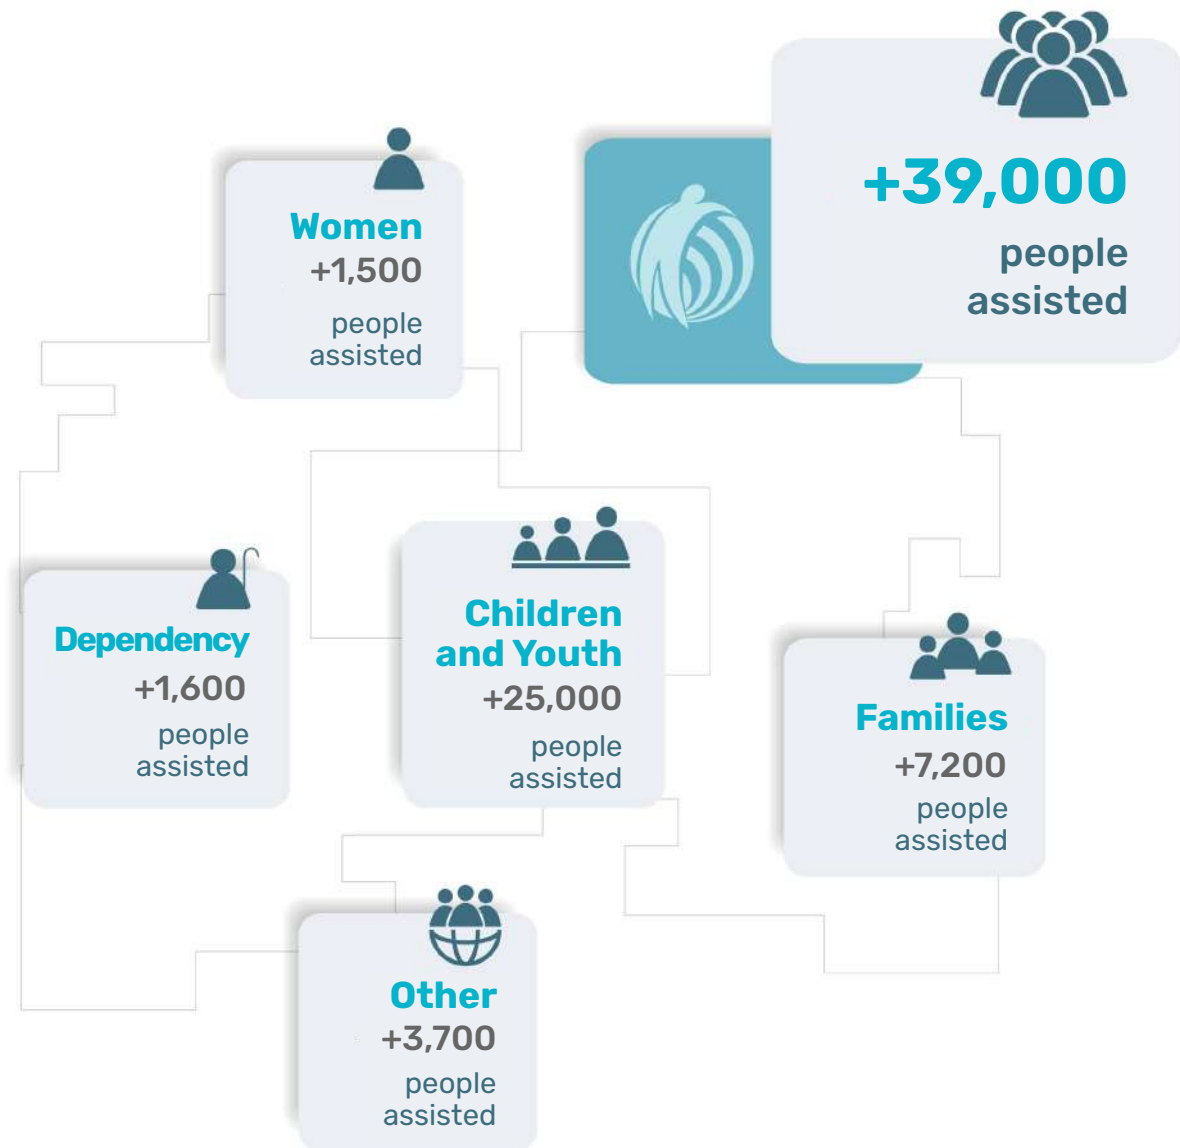

Fundación Diagrama in figures

Through all these areas and activities, in **2024** Fundación Diagrama attended to the needs of more than **39,000 people** across Spain.

- Close to **3.600 boys and girls** in need of protection and care.
- Over **7,000 young people** in conflict with the law.
- Close to **870 people** in situations of dependency.
- Close to **5,000 families** who need assistance with their social integration or familiar cohabitation.
- Over **2,100 adoptive and/or foster families**.
- Over **1,200 women** who are victims of gender violence, and their children.

- Close to **6,300 young people and adults** in need of training, guidance and support in their social and occupational integration process.
- More than **9,200 people**, especially young people and families, who participate in social prevention and health promotion programmes.
- Close to **1,000 people** with addiction issues.
- More than **2,600 people** in prison or after being released.

2

Socio-Educational Area

The main goal of the centres, projects and programmes in this area is to assist people in their acquisition of knowledge, skills, tools, principles and social standards of conduct and coexistence, as part of their process of personal growth and socialisation.

Young people and adults are offered a structured pedagogical and training context which promotes education, learning and the development of values and positive behaviour, as well as personal and professional competence, so that they can develop an independent, responsible and satisfying lifestyle.

Last year the needs of **over 30,000 people** were addressed in this area. Diagrama has assisted **over 258,000** children, young people, families and adults in this field since its creation.

2.1. SOCIO-EDUCATIONAL PREVENTION

Prevention is a vital element of Fundación Diagrama's work, as it allows the organisation to detect problems, find the cause, anticipate negative situations, and intervene accordingly, reducing risk variables and strengthening protection ones. Through preventive intervention with vulnerable children, young people and families, Diagrama carries out programmes that enable these individuals to develop skills that help them resolve the issues they face in an adaptive way.

These programmes include several aimed at preventing truancy and school dropout, child-to-parent violence, and domestic and gender violence, as well as those aimed at promoting sport and environmental awareness.

Through the **23 programmes and 5 services** it has developed in this area over the last year, the foundation has assisted over **8,500 children, young people and families**. Since 1991, it has assisted more than **61,500 people**, of which more than 12,000 were children and young people subject to judicial or administrative measures.

2.2. CHILD PROTECTION

The educational centres for the implementation of protection measures for children in tutelage or guardianship, in application of Organic Law 1/1996, of 15th January, on Legal Protection of Minors, as well as the provisions of Organic Law 8/2015, of 22nd July, and Law 26/2015, of 28th July, on amendment of the system for protection of childhood and adolescence, seek to promote the full development of children's personality and their social integration, guaranteeing the conditions for the exercise of their rights as recognised by the legal system.

Within this area, Fundación Diagrama also promotes and manages **residential centres for unaccompanied migrant children**.

Additionally, this area includes specialised **educational care centres for children with mental health issues**.

They are oriented to therapeutic, personal, social, family, and educational intervention for children and young people who show needs related to these issues, so that their development and integration in all areas of daily life is positively impacted.

Last year, Fundación Diagrama managed **126 centres** and services in this field:

- 36 residential centres and flats, 2 with special education units.
- 18 flats for independent living.
- 11 centres for special education and therapeutic care.
- 1 mental health centre.
- 3 care programmes for children at risk or without protection.
- 56 residential centres for unaccompanied migrant children.
- 1 pick-up and transfer service for children in the protection system.

Through all these resources, Diagrama attended to around **3,500 children** last year, reaching 32,500 since 1991.

2.3. CHILDREN AND YOUNG PEOPLE IN CONFLICT WITH THE LAW

The educational centres and programmes for the execution of judicial measures, according to Organic Law 5/2000, of 12th January, Regulating the Criminal Responsibility of Children, can be of the following types:

Community-Based Centres and Programmes

These are educational programmes that are carried out within the child's social environment, using community networks to promote their social and family bonds, as well as their participation in social institutions.

Over the past year, Diagrama has managed **18 community-based centres and programmes** throughout Spain, including homes for cohabitation with an educational group. Through this, Diagrama assisted around **5,800 children**. Since 1991, the foundation has assisted around **62,000 children** in these centres and programmes.

Youth Detention Centres

These centres aim to offer an educational context for the young person that promotes the child's autonomy and acquisition of the necessary skills to adequately integrate into society. Sanctions to be completed in these centres can be carried out in an open, closed or semi-open regime.

Over the past year, Diagrama has managed **19 detention centres** throughout Spain, assisting close to **1,000 children**. Since 1991, more than **32,000 children** have been aided in these custodial centres.

Youth Detention Centres Specialised in Mental Health Support

These centres are suitable for cases of children affected by substance addictions or significant psychological dysfunctions.

These centres provide a structured context for children to carry out an individualised clinical intervention to deal with the problem, reinforcing the child's psychosocial development. Sanctions to be completed in these centres can be carried out in an open, closed or semi-open regime.

Over the past year, Diagrama has managed **2 of these centres** in Spain, as well as offering specialised **therapeutic care in 11** of the above-mentioned detention centres. Using these resources, the foundation assisted more than **320 children**. Since 1991, more than **4,800 children** have been aided by the organisation in this type of resources.

SOCIO-EDUCATIONAL AREA |
Fundación Diagrama

2.4. FAMILY SERVICES

Fundación Diagrama develops numerous initiatives to address the needs of families via prevention, guidance, training and intervention programmes. The main aim of these services is to provide comprehensive assistance to whole families, their individual members, and the relationships they have with each other. In order to develop these resources, Fundación Diagrama works with a multidisciplinary team of professionals with ample experience in the fields of psychology, social work, social education, pedagogy, and medicine, among others.

Within this area, programmes aimed at prevention and intervention in situations of family violence are of particular note, especially in cases where children exhibit **violent behaviours against their parents**, relatives or tutors (child-to-parent violence). These services help to build a healthy family dynamic between parents and children, based on mutual respect, responsibility, compromise, tolerance, and open and fluid communication.

Last year, the foundation managed **11 programmes and services aimed at families who presented social integration problems, or conflict situations at home**, which assisted close to **2,500 families**. Since 1991, more than **22,000 people** have participated in these programmes.

Diagrama has also developed programmes offering guidance and advice during **adoption or fostering** processes, aiming to facilitate the acquisition of skills and knowledge necessary to formalise and carry out the adoption or fostering of a child. These programmes offer awareness-raising, information, guidance and training activities for families, alongside suitability assessments, preparation for adoption or fostering, monitoring, technical guidance and post-adoption support.

Currently, Fundación Diagrama manages **2 adoption and fostering programmes**, which last year assisted close to **2,200 families**. Since 1991, over **18,400 people** have participated in these types of programmes.

Diagrama also manages **6 family meeting points**, which aim to guarantee the right of children to maintain a relationship with their parents when they do not live with them due to separation, divorce, or other circumstances disrupting their coexistence. Last year the foundation assisted more than **2,500 people** through these facilities, and has assisted over **11,000** since 1991.

2.5. SUPPORT PROGRAMMES AND SERVICES FOR WOMEN

Fundación Diagrama develops initiatives and projects aimed at women and their children who find themselves in emergency situations or at risk of exclusion, either due to being victims of gender-

based violence or due to any other circumstance that leaves them without family or social support.

These resources provide them with the support they need to regain balance in their lives, to confront their situation and to achieve full personal and family independence. Using these resources, Diagrama gives them comprehensive assistance, offering alternatives and working in all areas of their lives (health, legal procedures, family intervention, education, training and professional integration, etc.), as well as helping their children to overcome the episodes of abuse and/or rupture within their family.

Over the past year, the foundation has managed **1 support programme and 2 supported living flats** for this collective, as well as the **Network of Comprehensive Assistance to Victims of Gender Violence of Cantabria**, made up of various complementary services and resources. Using these resources, Diagrama assisted more than **1,200 people**. Since 1991, over **9,600 people** have been assisted by the foundation through these types of resources.

2.6. INTERVENTION WITH PEOPLE IN PRISON AND AFTER RELEASE

Fundación Diagrama carries out intervention projects and programmes in this field, carried out in the foundation's facilities, in penitentiary centres or in social insertion centres, always in

collaboration with the General Secretariat for Penitentiary Institutions of the Ministry of Home Affairs.

The aim of these initiatives is to provide the assisted people with fundamental knowledge, skills, tools, and principles as part of a process of personal growth, socialisation and reinsertion. The development of positive values and behaviours, as well as training their personal and professional competence, allows people who have been released from the penitentiary system to develop a personal, social, family and working lifestyle that is independent, responsible, and satisfactory.

Through **13 programmes, 1 semi-supported living flat and 2 social and personal skills development workshops** carried out in penitentiary centres, Diagrama assisted over **2,600 people** last year. Since 1991, over **15,000 people** have participated in these programmes.

SOCIO-HEALTHCARE AREA |
Fundación Diagrama

3

Socio-Healthcare Area

Fundación Diagrama's Socio-Healthcare Area promotes and develops centres, services, initiatives and actions aimed at satisfying the needs of every person that requires simultaneous and continuous personal and health care.

Diagrama uses a model in which health is understood globally (physically, mentally and socially), which comprehensively attends to the psychosocial and medical needs of every group that requires this intervention:

- Elderly people in a situation of dependency.
- People with a mental and/or physical disability.
- People with addiction issues and/or dual pathology.
- People with mental health issues.

Every year, the needs of around **2,800 people** are attended to in this area, with close to **40,000 people** attended in this area since 1991.

3.1. HEALTH PROMOTION

Diagrama develops actions aimed at health promotion and illness prevention. Special emphasis is placed on those that promote an active and healthy attitude in order to avoid physical, psychological and/or social deterioration of patients, promoting and improving their quality of life.

These actions include dependency prevention, promotion of physical activity, self-care and quality of life, active ageing, promotion of healthy habits, family and social participation and promotion of mental health.

Last year, Diagrama managed **19 programmes and projects** in this area:

- 2 programmes for health promotion for children and young people.
- 9 programmes for active-ageing for persons over 55.
- 5 programmes for the promotion of family participation and community participation for elderly people.
- 1 programme for informal carers of dependants.

Using these resources, last year Diagrama assisted **more than 1,000 people**. Since 1991, **close to 13,500 people** have been aided through health promotion programmes.

3.2. DEPENDENCE

The main objective of Fundación Diagrama's intervention in this area, regulated by Law 39/2006, of 14th December, on the Promotion of Personal Autonomy and Care for People in a Situation of Dependency (LAPAD in Spanish), is to offer the personal, family and social attention that people in a situation of dependency need through the provision of healthcare services, collaborating constantly with the relevant public authorities with the skills and responsibilities for developing the System for Autonomy and Care for Dependence (SAAD in Spanish).

Thus, by managing and developing initiatives, programmes and resources aimed at people who find themselves in a situation of dependence due to age, illness or physical or psychological disability, Diagrama provides the appropriate personal, familial and social care they require, helping their active incorporation into the community and the development of their personal autonomy.

Elderly people in a situation of dependency

Fundación Diagrama has care homes and day centres to attend to the needs of elderly people.

The **care homes** for the elderly are open gerontology centres providing comprehensive healthcare attention for elderly people with some degree of dependence, in temporary or permanent residential regimes.

In these facilities a team of professionals from fields such as medicine, psychology, nursing, occupational therapy, and social work, as well as support and service staff, perform their daily tasks using a multidisciplinary, integrated and specialised approach, guaranteeing the quality of life of every person assisted.

These centres also have specialised units to deal with various pathologies that are frequently present among elderly people, such as Alzheimer's disease, in a specific and comprehensive manner.

Over the past year, Diagrama has managed **5 care homes for elderly people**, assisting more than **500 people**. Since 1991, these resources have aided around **6,600 people**.

The **day centres and services** are healthcare and family support services that offer individualised day care programmes covering the basic personal, therapeutic and socio-cultural needs of people affected by different degrees of physical and/or psychological disabilities, keeping them in their habitual environment.

Over the past year, Diagrama has managed **3 day centres and services**, assisting more than **40 people**. Since 1991, roughly **1,500 people** have been aided through this type of resource.

People with a disability

The **centres for people with a physical and/or psychological disability** are based on a multidisciplinary perspective, working to address

all the bio-psycho-social needs of adults with differing degrees of physical and/or psychological dependence, in a comprehensive manner.

These centres combine specialised facilities and professionals whose objective is to facilitate the full social integration of people who, due to congenital or acquired causes, have a physical and/or psychological disability.

The **centres for early childhood intervention and development** also operate within this field, aimed at children who experience, or are at risk of, developmental issues due to biological or social causes.

Over the past year, Diagrama has managed **1 early intervention centre, 1 mental disability centre and 1 physical disability unit**, through which it assisted around **130 people**. Since 1991, more than **1,500 people** have been aided through these types of resources.

3.3 PEOPLE WITH MENTAL HEALTH ISSUES

People with chronic and severe mental illnesses experience complex difficulties related to developing basic everyday life skills, which negatively impact both their quality of life and their relationship with their family and social environment. Fundación Diagrama works to provide specialised care, support, and rehabilitation for these people, promoting their psychological and social integration.

The **mental health centres** utilise services and resources to promote the personal and social growth of these individuals, paying particular attention to their difficulties and needs and also providing a support service for their families. The centres aim to achieve the full development of these individuals' abilities and skills, promoting greater personal autonomy and their capacity for integration within their community, thus improving their quality of life.

Over the past year, Diagrama has managed **4 mental health centres**. Through these, Diagrama assisted over **200 people**. Since 1991, more than **2,800 people** have been aided by these resources.

3.4. ADDICTION INTERVENTION

Basing its work on a bio-psycho-social model and multidisciplinary approach, Fundación Diagrama intervenes in the area of addiction issues by developing various initiatives in **prevention, rehabilitation, awareness-raising and family, social and professional integration**.

These intervention areas, as well as the programmes carried out within them, are included within the **Helianthus Project**, a comprehensive system that facilitates assisting people with addiction issues throughout their entire rehabilitation and re-integration process, in line with the principles of the Spanish National Drug Strategy and the US' National Institute on Drug Abuse.

Certified by the ISO 9001:2015 quality standard, this innovative project allows each user to receive the support they require from the various mechanisms of support available to them (psychological and educational assistance, family support, professional integration...) in order to achieve better independence in life. It utilises a network methodology that contributes to improving the communication and coordination between the specific resources that each person requires (health centres, substance misuse intervention centres, social services...).

The project also reinforces the preventive aspects of intervention in addiction issues, developing various health and security awareness activities aimed at young people and adolescents.

Last year, Diagrama managed **10 prevention, intervention and integration programmes and 1 day centre** tackling addiction, through which it assisted more than **1,000 people**. Since 1991, over **13,700 people** have been assisted using these types of resources.

4

Socio-Occupational Integration Area

*Fundación Diagrama combines work in social and occupational fields to **improve the professional qualifications** of its beneficiaries while attending to their personal, family and social needs.*

The foundation carries out Socio-Occupational Integration Programmes in different regions aimed at people at risk of social exclusion, focusing especially on young people who have difficulty finding jobs and integrating themselves socially, many of them involved with the juvenile justice or child protection systems.

These programmes aim to promote the social and occupational integration of their beneficiaries using personalised itineraries that include intervention, advice and accompaniment during their process of integration. Guidance programmes, personal skills development, occupational and professional training, pre-professional training, training internships in companies, and employment support are included within these programmes.

Last year, Diagrama managed **60 social and occupational integration programmes and services:**

- 5 programmes for children and young people involved, or previously involved, with youth justice or protection systems.
- 17 programmes for young people and adults at risk of exclusion.
- 1 programme for people with addiction issues.
- 1 programme for people in prison and after release.

- 3 programmes for unemployed adults.
- 4 programmes for women who have been victims of gender-based violence.
- 29 occupational integration apartments for young people at risk of exclusion.

The foundation also operates over 120 pre-professional workshops that are carried out within its child protection or youth justice centres, incorporating every child assisted in them. The courses currently available include sustainable agriculture, gardening, cookery, basic building maintenance, carpentry, handicrafts, pottery, pyrography, printing, mosaics, information technology and animal care, among others.

Last year, around **6,300 people** participated in these socio-occupational integration programmes. Since 1991, over **106,000 people** have been assisted through these resources.

4.1. PROFESSIONAL TRAINING

Professional training is instrumental to promote the employability of students and workers in a constantly changing labour market. It is also essential to reinforce the efficiency of organisations, as the workforce is a key factor for success.

In this area, Fundación Diagrama is authorised to carry out courses with regard to obtaining **Professional Certificates** with official accreditation, included in the Spanish National Catalogue of Professional Qualifications. These certificates, organised according to their professional field and qualification level, accredit the professional skills they provide officially and with state validation in order to perform an identifiable labour activity within the productive system.

Administration and Management

- Recording methods and treatment of data and documents.

Agriculture

- Installation and maintenance of gardens and green zones.
- Assistant activities in nurseries, gardens and garden centres.
- Assistant activities in forest conservation and recovery.

- Assistant activities in agriculture.

Construction and Civil Works

- Bricklaying factories.
- Decorative painting in construction.

Energy and Water

- Assembly and maintenance of solar thermal facilities.

Socio-cultural and Community Services

- Social and health care for dependent persons in social institutions.

In addition, in collaboration with several Spanish regional administrations, Diagrama also provides young people with the opportunity to attend Vocational Training Programmes (FPB), lasting 2 years, as well as Vocational Training Programmes for Basic Qualification (PFCB), lasting 1 year. These accredited programmes train them to attain an official certificate that allows them to access the labour market with the qualifications required.

Diagrama currently offers the following regulated vocational training:

- FPB Auxiliary Activities in Nurseries, Gardens and Garden Centres.
- FPB Basic Cookery Operations.
- PCB Auxiliary activities in Building Maintenance.

- PFP Auxiliary activities in Nurseries and Gardens.
- Training programme in Recording and Treatment of Data.

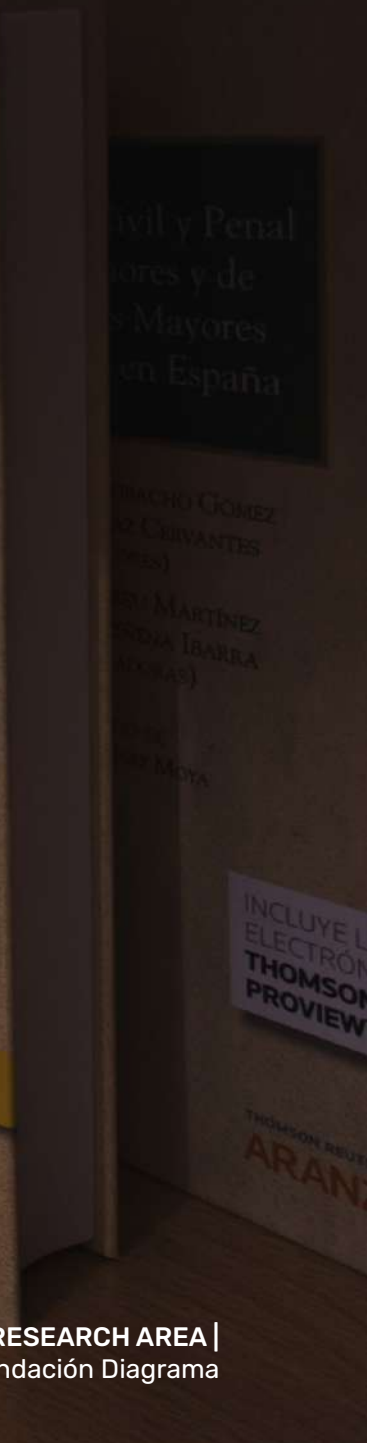

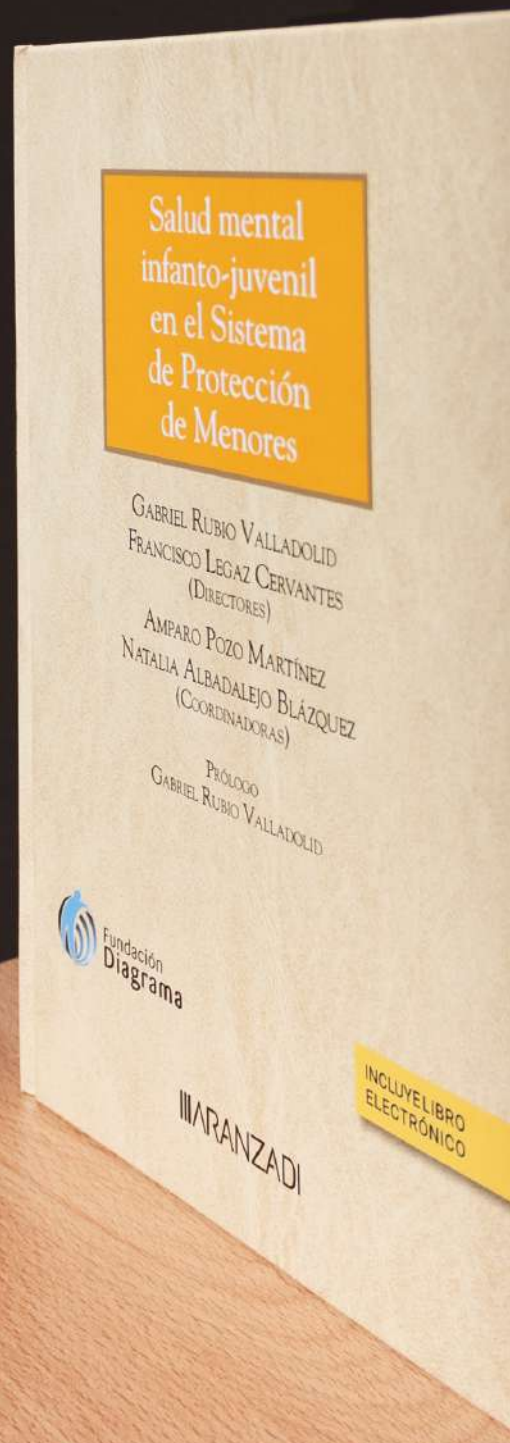

4.2. NODUS NETWORK

The Foundation created the **Nodus Network** in 2015 in order to facilitate the integration process of all its beneficiaries. The network is a collaborative, open, and free space to combine the efforts of companies and public and private institutions to promote the social integration of people at risk of exclusion, especially young people between 16 and 30 years old who are in a situation of vulnerability or who have been in the protection or youth justice systems.

Last year, around 1,900 members, mainly companies, participated in the Network.

SOCIO-OCCUPATIONAL INTEGRATION
AREA |
Fundación Diagrama

5

Training and Research Area

5.1. CONTINUOUS TRAINING FOR PROFESSIONALS

Given the great importance of human capital in its activities, Fundación Diagrama pays special attention to training its work teams, providing initial, specialized, and continuous learning courses. This allows them to perform their daily work with a solid training base that strengthens both their personal and professional development.

Since its inception, the workers at Diagrama have done over **11,000 specialisation and continuous learning courses** to improve their competencies and widen their knowledge in the area they are working in. More than **8,000 professionals** have been trained through these courses.

5.2. PROFESSIONAL TRAINING

Fundación Diagrama develops **training activities for professionals and specialisation courses** aimed at helping professional training and personal growth. These activities allow participants to acquire and improve professional skills in social, educational, legal and healthcare fields.

Furthermore, as an expert organisation in subjects related to juvenile justice, the foundation carries out **supporting training activities** for technical teams in the Public Administration sector. Among those are juvenile delinquency prevention and intervention workshops, especially regarding violence in the school environment and violence carried out by children towards their parents or guardians.

5.3. RESEARCH AND PUBLICATIONS

Fundación Diagrama is aware of the importance of generating knowledge related to its main areas of intervention and thus works in the development of **national and international research and publications**, aimed at specialised professionals and specific social agents, as well as the general public. This task of researching and spreading information aims to develop more effective strategies and intervention models, which contribute to create a fairer and more solidary society.

Some of the projects developed in the past year include:

- UpFamilies: Online Resources to Support Prisoners' Families. 2021-2024.
- Programme 25: A study of ageism in care homes for the elderly. 2023-2024.

- Study of the effects of virtual reality intervention on the risk of recidivism in children subject to judicial measures who present substance abuse issues. 2024.
- Minimising the effects of childhood institutionalisation: A diagnostic of requirements. 2024
- Programme for the promotion of active and healthy ageing: A comparative study concerning the actions of the Third Sector of Social Action in Spain and third countries in terms of participation. This study was developed by Fundación Diagrama at a national level and financed by the Secretary of State for Social Rights of the Ministry of Social Rights and 2030 Agenda. 2024.

Since 1991, Fundación Diagrama has developed or collaborated in over **70 research projects in Spain and Europe** in its different areas of intervention, in collaboration with different national and international organisations.

As a result of this research, its daily work and other national and international projects, Fundación Diagrama has published or collaborated on editing over **80 specialised publications**, mainly focused on educational, social, legal and healthcare fields.

5.4. COURSES, SEMINARS AND CONFERENCES

Fundación Diagrama carries out courses, seminars, and congresses, both by itself and in collaboration with other organizations and public and private organisms. These actions, which usually address social, legal, healthcare and occupational integration topics, encourage the creation and spreading of knowledge, contributing to networking and social awareness.

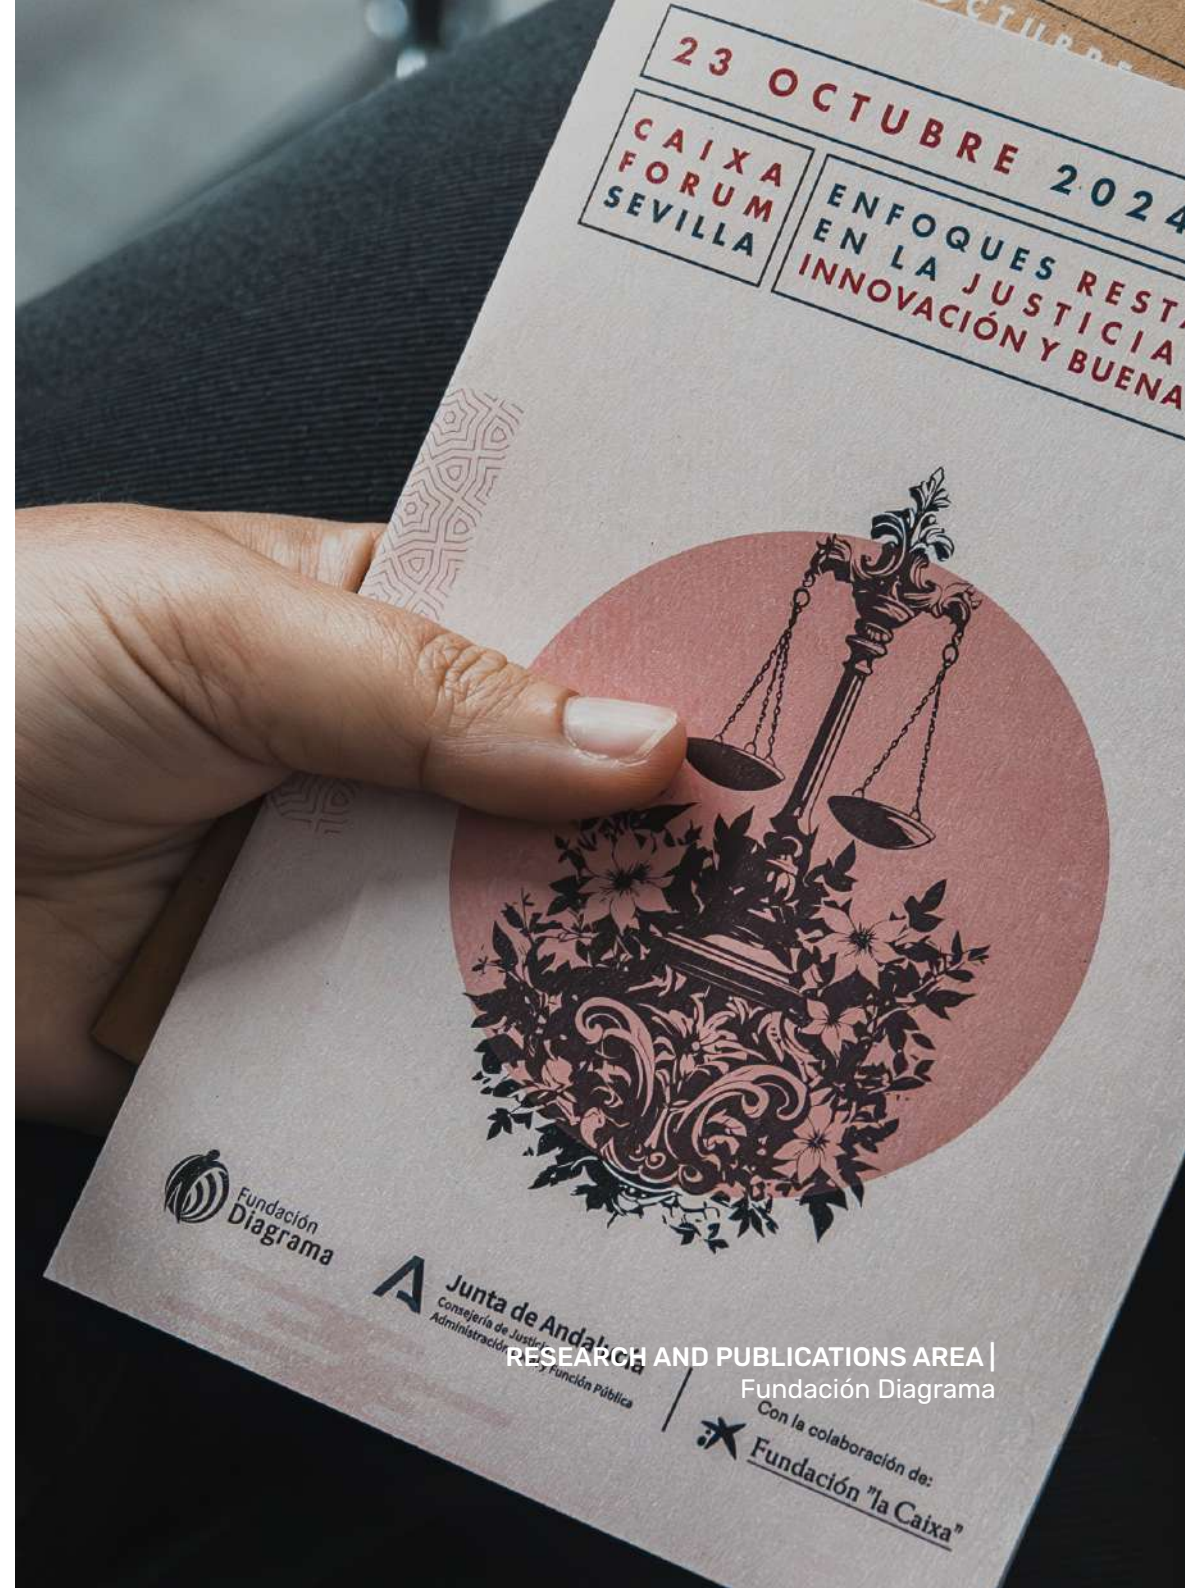

The events organised by the foundation the past year include:

- Seminar "Restorative approaches in juvenile justice: innovation and good practice". Seville.
- Seminar "Digital Transformation and The Third Sector of Social Action: Overcoming Digital Breaches". Caudete (Albacete).
- Webinar "Active and healthy aging: challenges of the Third Sector".
- Webinar "Active and healthy aging: participation from the point of view of the Third Sector of Social Action".
- Seminar "Support services for families of people in prison". Murcia.
- Seminar "25 years of advancement of Juvenile Justice in Andalusia". Seville.

As well as this, the foundation has participated in around 20 other events, from which the following stand out:

- Seminar "Towards a new Childhood and Adolescence Act in the Region of Murcia".
- II ACORES International Conference "Exceptionally vulnerable children and young people in childhood protection. International revision of innovative therapeutic programmes". Oviedo.
- I International Seminar on Digital Sexual Violence. Madrid.
- Training seminar "Against social exclusion, everything counts". Madrid.
- Training day "Deconstruction of masculinity in people with addictions". Madrid.
- Training day on prevention of the phenomenon of violent radicalisation of young people in vulnerable situations. Tarragona.
- II Seniors Fair of Castile – La Mancha. Albacete.
- Roundtable "Something + than volunteers: The importance of intergenerational volunteering". Murcia.
- II Seminar on Residential Fostering. Can Tàpera (Mallorca)
- XXXI Psychology Seminar of the University of the Balearic Islands

- Awareness Seminar "Young people and Employment: the impact of uncertainty." Salamanca.
- IV Psychology Professionals Seminar. Gáldar.
- XI Regional Environment Conference of Young People (Confint). Logroño.
- I Meeting of Businesses and the Third Sector of Social Action of La Rioja.
- I Ciudad Real Family Week. 2024.

6

International Area

Development Cooperation

Fundación Diagrama has been working in this area since 2002, carrying out projects aimed at improving the quality of life of the population, always defending and promoting Human Rights.

Education, training, healthcare and sustainable self-management are priority areas to achieve this objective. To achieve this, the foundation works in conjunction with local counterparts with experience in their respective countries in these and other matters. These projects are developed in different countries of **Latin America and Africa**, including El Salvador, Guatemala, Nicaragua, Paraguay, Honduras, Morocco, Mali, Senegal and Kenya.

Since 2002, more than 128,000 people have been directly assisted, with an estimated more than 320,000 indirect beneficiaries of these actions.

The main **courses of action** in this field are:

- Improving the situation and the quality of life of people who live in conditions of poverty and social exclusion.
- Facilitating care, education and social and occupational integration for children and young people at social risk.
- Contributing to creating healthy living conditions in developing countries.
- Contributing to the strengthening of local counterparts, public institutions and civil society to support their work towards sustainable human development.

- Spreading information among Spanish society about the circumstances and difficulties faced by southern countries and the transformations necessary for a change.

During 2024, Fundación Diagrama developed the programme “Promotion of the right to education and participation with a focus on gender and environmental sustainability of the rural community of Sandiara (Senegal)”, in which 40 women from M’Bour participated in theoretical and practical agricultural training programmes that allowed them to strengthen their work skills in the field of ecological production techniques.

7

Networks and Collaborators

*Fundación Diagrama belongs to and collaborates in numerous **national and international networks** sharing information, knowledge and values with them. These networks are formed as participatory, specialised and flexible structures, which aim to reach their comprehensive social care objective through collaboration of people, experiences and resources.*

Some of the networks to which Diagrama belongs, or works with, include:

- United Nations Economic and Social Council (ECOSOC).
- International Juvenile Justice Observatory (IJJO).
- European Voluntary Service (EVS).
- Justice to Youth Language Needs.
- Spanish Association of Foundations (AEF).
- Spanish Childhood Organisations Platform.
- Spanish Volunteer Platform (PVE).
- National Alliance for Zero Child Poverty.
- Lares – Federation of Centres and Services for Adult Care – Solidarity Sector.
- Spanish Federation of Third Sector Associations in the field of Child, Youth and Family Care and Juvenile Justice.
- Union of Associations and Organisations for Drug Addiction Assistance (UNAD).
- National Penitentiary Social Council.
- Penitentiary Social Organisations Network (ROSEP).
- SDG-Lab: Collaborative Laboratory for Social Innovation.

- Recognition by the association Cirugía Solidaria for the joint social and healthcare project developed in the Senegalese region of Thiès.

9

Additional Services

The creation and start-up of each one of these societies has been carried out within the judicial framework applicable to foundations under state responsibility, particularly according to the regulations established in article 24 of Law 50/2002, from the 26th of December, concerning Foundations; and article 24 of the Regulation of Foundations, passed by Royal Decree 1337/2005, from the 11th of November. In compliance with said regulations, they are correctly registered in the Central Commercial Registry and communicated to the Protectorate of the Ministry of Culture and Sport.

Azarbe Intervención Psicosocial, S.L.

Company created in 2005 to promote and develop centres, programmes and services working in the educational, psychosocial, therapeutic, training and socio-occupational integration fields. These services are aimed at the integration of people who find themselves in difficult or vulnerable situations or at risk of social exclusion, working with them so that they can achieve an independent, responsible and satisfactory lifestyle.

Protec, S.A.

Protec S.A. is an organisation which was created in 2003 with the goal of offering complete security services, specialised and individual, guaranteeing the full safety of the people it works with. Under the commercial brand **United Safe Care**, it offers protection services for people, along with surveillance and protection of goods, establishments, shows and conventions. It is registered in the Registry of Security Companies of the General Direction of the Police of the Spanish Ministry of Internal Affairs, with the number 3,113.

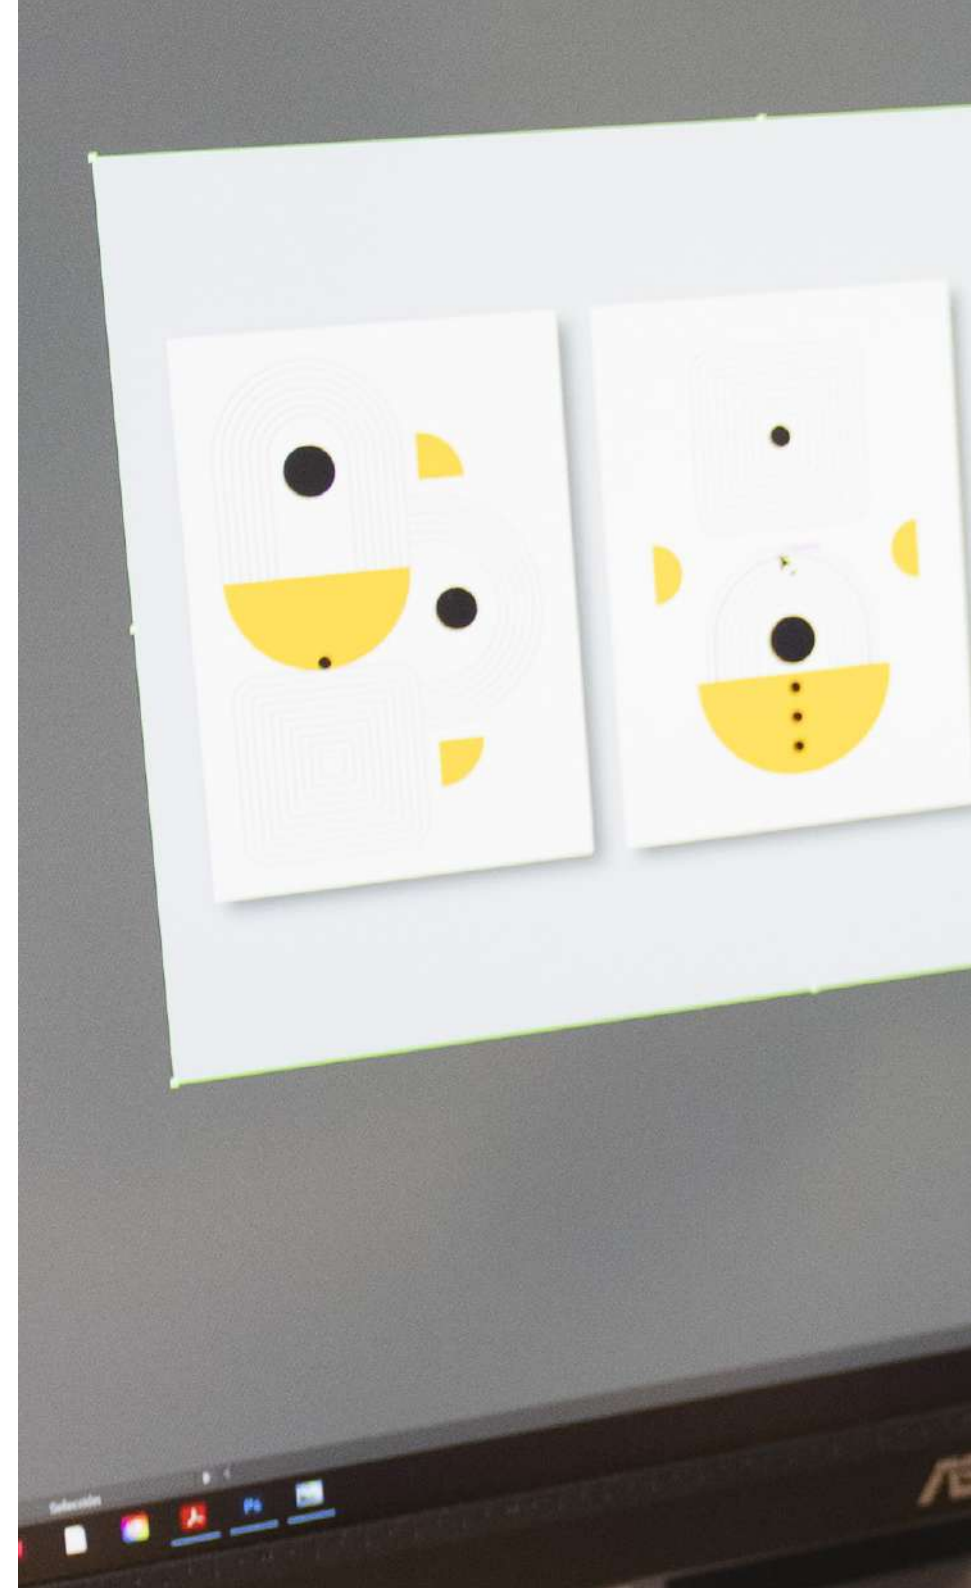

Zekia Servicios Auxiliares, S.L.

Company created in 2014 with the goal of offering auxiliary services in public or private buildings and properties, such as management assistance, reception, access control, and maintenance of facilities. Zekia also offers general services such as transportation of goods or passengers, waste management, hygiene and cleaning, laundry, food and catering, amongst other personal assistance services for particularly vulnerable groups.

Nostrum Integra, S.L.

In 2018, Fundación Diagrama established the Nostrum Integra S.L. integration company, registered with the code 50/MU0005EL in the Administrative Registry of Integration Companies in the Region of Murcia. This organisation, which offers printing, production and publication services, collects and broadens the social work that Fundación Diagrama has been doing since 1999 under the commercial brand IM Nova. From the beginning, said printing house has been committed to vulnerable people and has promoted their training and integration into society and work.

As an integration company, IM Nova reinforces its training and professional development work aimed at people in situations of exclusion who need a push to reach their full integration, for which it is essential to help them better their employability. In this sense, a part of their staff is comprised of people in social difficulty. IM Nova also organises productive workshops and occupational training courses directed at this group, allowing them to acquire the necessary professional training and knowledge to enter the job market.
